

DIPLOMA IN SUPPLY CHAIN MANAGEMENT WITH ERP SCM Training Program

Supply chain management programs are offered at all levels of desired expertise including certificate or diploma, associate's degree, bachelor's degree, or master's level. The supply chain management program integrates various supply chain topics from manufacturing, purchasing, transportation, and physical distribution into one unified program. Students learn the foundation and structure of what makes up a supply chain and are able to pursue various areas of concentration within the program.

The core curriculum in supply chain management consists of such courses as procurement and supplies, manufacturing planning and control, logistics and transportation management, and supply chain application. The procurement and supply chain management or supplies consists of introducing the students to purchasing processes, procurement cycles, research, negotiations, how to make effective relationships with suppliers, and commodity planning. The introductory courses available in the program provide students with enough exposure to the field that they can make an informed decision on the correct career path.

This Program is ideally suited to following individuals who are:

- Professional working in materials management, physical distribution and logistics areas or those professional who need to understand how their job affects the production and on time delivery of products to customers.
- Participants in the Diploma Program are typically involved in one or more of the following areas: planning, manufacturing control, inventory control, physical distribution and logistics.
- Those people who would like to develop their skills regarding Supply Chain Management.
