

ISO 27002 Information Security Management Systems [ISMS] Training Program

The ISO 27002 standard is the rename of the ISO 17799 standard, and is a code of practice for information security. It basically outlines hundreds of potential controls and control mechanisms, which may be implemented, in theory, subject to the guidance provided within ISO 27001.

In addition, the participant will be able to become proficient in the best practices in the implementation of information security control measures based on the eleven (11) ISO 27002 domains: security policy, organization of information security, asset management, human resources security, physical and environmental security, communications and operations management, access control, information systems acquisition, development and maintenance, information security incident management, business continuity management and compliance.

This Program is ideally suited to following individuals who are:

- Interested to start their career in the field of Information Security
- Information Security Advisors, Security Supervisors and Security Administrators
- Person responsible for the information security or conformity in an organization.
- Information security team member.
- Expert advisor in information technology.
