

# **PROTECTIVE COATING/INDUSTRIAL PAINTING**

**(FOUNDATION & INTERMEDIATE LEVEL)**  
**Training Program**

The application of protective coating represents the most widely adopted means of controlling the corrosion of structural metals. Regrettably, all often the Coating fails to achieve the results expected of it. This may be because of an inappropriate coating system, failure to appreciate or to satisfy the technical requirements of the application process, inadequate inspection, or on occasions, defective materials.

The course seeks to present an overview of protective coating technology, to establish the fundamentals of sound coating selection, and introduce the methodology underpinning successful coating application. These general aspects of the subject are reinforced by discussion Of practical coating problems, with particular reference to the petroleum and petrochemical industries/marine sea – water environment.

**This Program is ideally suited to following individuals who are:**

- **Fresh DAE /Engineers People who may like to establish their career in the field of Industrial Painting and Coating.**
- **Already working class Supervisor/Foreman who are willing to update and learn the new methodologies of Protective Coatings.**
- **Who want to be good and reputable jobs in the market and are like to enhance their skills in Protective Coatings and Its Standards.**
