RED HAT LINUX Training Program

Introduction:

This course relates to Red Hat® Enterprise Linux 7. Linux administration involves a fair amount of interaction with system hardware, kernel and the network. This course provides a hands-on approach to these and other advanced administrative tasks that are unique to LINUX. After the completion of this course, Attendees would be able to apply their knowledge and skills within their corporate Heterogeneous environment. They would also be able to apply the skill sets in different Linux and other UNIX flavors.

This course would help you to get certified for **Red Hat Certified System Administrator (RHCSA) Exam (EX200)**, which includes the following core system administration tasks needed for Red Hat Enterprise Linux:

Red Hat System Administration I (RH124)

Red Hat System Administration I (RH124) is designed for IT professionals without previous Linux administration experience. The course focuses on providing students with Linux administration "survival skills" by focusing on core administration tasks.

Red Hat System Administration II (RH134)

This course is specifically designed for students who have completed Red Hat System Administration I (RH124). Red Hat System Administration II (RH134) focuses on the key tasks needed to become a full time Linux administrator.
