ISO LEAD PROJECT MANAGER

Have you ever taken the responsibility of organizing a surprise birthday party? Maybe you were in charge of planning the family camping trip? At work, were you given the task of creating a marketing plan, implementing changes to reduce operation costs, or introducing new software for client management? If you did any of these then you are already familiar with various aspects of project management and you have been developing the skills that project managers need. PECB's ISO 21502 training courses aim to help you advance your project management skills and set you on a path to becoming a great project manager.

What is ISO 21502?

As an update of ISO 21500:2012, ISO 21502:2020 provides guidance that can help project managers and project-based organizations deliver projects successfully. The standard also provides high-level descriptions of practices that are effective in project management.

The guidance provided by ISO 21502 can be applied to any type of organization and all types of projects. Moreover, apart from project managers and executive management, the standard can be used by project sponsors and boards, auditors, and organizations that develop national or organizational standards or practices for project management.
