MS PROJECT (PROFESSIONAL)

Getting started with PM software through hands-on, basic training. Participants will gain a thorough background in the concepts of planning and scheduling while learning MS Project. This course leads you through hands-on workshops that create and track an entire project to completion using the three basic elements of project management: schedule, resources, and costs.

Audience

- ✓ New users of MS Project

This course targets company senior management, department/functional heads, project managers and project team members in the successful planning, management, students and control of projects.

Prerequisite

- ✓ A working knowledge of Windows™

COURSE OUTLINE:

All sections of the course are based on theoretical and practical knowledge with many examples of the application of project management in completing successful projects. The course is interactive with lectures using presentations, question and answer sessions, individual and group exercises, and a concluding test of the principles to reinforce the transfer of project management knowledge to the participants.
