## Training Program

### Network Security Course Outline:

This course provides practical knowledge (with theoretical lectures) to allow Information Security Managers to understand the latest algorithms have been used in security world and also understanding about the Network Security.

- OSI and TCP/IP models
- Protocol types and security issues
- LAN, WAN, MAN, intranet, and extranet technologies
- Cable types and data transmission types
- Network devices and services
- Communications security management
- Telecommunications devices and technologies
- Remote connectivity technologies
- Wireless technologies
- Network encryption
- Threats and attacks
- Software-defined routing
- Content distribution networks
- Multilayer protocols
- Convergent network technologies

### Major Domains:

The professional should fully understand the following:

Communications and network security as it relates to voice, data, multimedia, and facsimile transmissions in terms of local area, wide area, and remote access networks

Communications security techniques to prevent, detect, and correct errors so that integrity, availability, and the confidentiality of transactions over networks may be maintained

Internet/intranet/extranet in terms of firewalls, routers, gateways, and various protocols

Communications security management and techniques that prevent, detect, and correct errors so that the confidentiality, integrity, and availability of transactions over networks may be maintained.
