True Blue Hacking Training Program

Course Scope

Cyber Security is one of the fastest-growing fields worldwide, with increasing demand for Ethical Hackers, Penetration Testers, SOC Analysts, Security Engineers, and Vulnerability Assessment professionals. Organizations in banking, telecom, software houses, government sectors, and multinational companies actively require skilled cyber security professionals to secure their systems and data.

After completing this course, participants can explore opportunities in Web Application Security Testing, Network Security, API Security Testing, Mobile Application Security, Vulnerability Assessment, and Red Teaming. Freelancing, bug bounty hunting, and remote international security projects are also strong career paths in this domain.

Course Objectives:

This course aims to build strong fundamentals in Networking, Linux, Cyber Security, Ethical Hacking, and Penetration Testing through practical learning and real-world labs.

Participants will learn how to identify vulnerabilities, analyze security weaknesses, and use industry-standard security tools for web, network, API, and mobile security testing.

By the end of the training, students will have the skills required for entry-level cyber security roles, advanced certifications, and practical security assessment projects.

As Industry Experts & Senior Cyber Security Trainers, we at 3D Educators – Trainers & Consultants are committed to delivering high-quality practical training. Our focus is to develop skilled professionals with real-world knowledge, hands-on experience, and industry-standard techniques to help them become successful Cyber Security experts.

Inauguration

The Training Program will be inaugurated by a senior member of 3DEducators.
