YOUNG PROFESSIONAL IT & CYBER SECURITY LEADERSHIP PROGRAM

There are number of students who are trying to establish their career in the field of Information Technology & Cyber Security. Unfortunately they cannot be able to have a right guidelines and directions to establish their career and get appropriate job. The courses or curriculums that have been running usually in the schools, colleges and universities are obsolete and out of market. So industry is not accepting them after any sort of qualification when they completed their studies so far. As far as concerned respect to emerging technologies, which is bundling with industrial revolutions 4 and 5 their systemic methodologies are now entirely changed. They are working with most precise, effective, and robust result oriented techniques and methodologies. Therefore, to survive in the local or international market they need to understand the technology at all level and learn that how to deliver projects and its concerned work.

To finding the gaps on this issue, we can sorry to say that; right now it is a huge gap between the industry & Academia, and now this gap is so much broader or wider, and cannot be filled at this stage, because it takes too much time to upgrade and requires involvement of various stakeholders from public and private sector to redefine a new curriculum, where also need updated faculties who can deliver, which is impossible with recent scenarios.

So there is only one thing to fill this gap that we can enable our students who can be able to perform and knowing about recent and emerging technologies & methodologies. So according to aforementioned problem Young Professional Program - IT & Cyber Security Leadership YPP has been designed, which develops the necessary skills to perform in the recent environment.

The research and gap analysis is done by Dr. Muhammed Shaheer Waqar (PhD, MS, MBA, MSc), who is also educationist as well as the consultant in the field of IT and Management and performing his duties for last 22 years. This YPP is designed for all who are interested in the IT with have basic or minimal knowledge of Computers and its technology. This program is also feasible for those who want to change their field and would like to work in the field of IT. So we can say that every person from any level can participate this program and get a good & appropriate job in the Global market

YPP-IT has 16 major subjects, where each subject differs in credit-hours. The content and courses shall be changed according to needs and requirement of industry by time to time. But it is ensured that these courses will enhance the skills, knowledge of the candidates and help out to boost their career.
